

Meet Your **LEARNING ASSISTANT** this summer!

INTERACTIVE WHITEBOARD

Teachers worldwide use **Interactive Whiteboard** to transform traditional teaching and learning into an ultimate fun experience to the young ones.

Now, our students are as lucky as other kids around the world.

What is an interactive whiteboard?

An interactive whiteboard looks much like a standard whiteboard but when is connected to a computer, it becomes a **touch-responsive giant**. Interactive whiteboards engage students with **vivid images**, **video** and **audio**. This computer-integrated learning tool allows teachers to have **dynamic interaction** with students.

- IW** stimulates students and the majority of them show increased motivation.
- IW** brings students an enjoyable interaction that the technology offers.
- IW** enables tutors to use multimedia resources with a whole class.
- IW** makes the subjects taught come alive.
- IW** captures the attention of learners significantly.
- IW** encourages the involvement of learners in the subject.

Interactive whiteboards are a key component to children classrooms in the 21st century.

**Interactive whiteboards will be used
in our classrooms since this summer!
Enjoy this touch-screen learning experience
with your Graceful Hands!**
